Subject: Stop Wasting Our Money

Stop spending my tax dollars on battling Microsoft anti trust lawsuits.

It's a free market economy and if other companies can't compete against Microsoft, they should go out of business.

If you need to find a good cause to spend our tax dollars fighting, try reverse discrimination with Affirmative Action. They mandate lesser qualified ethnic minorities just to meet the lawful quota. I see this happen first hand in the state university system in PA. If I were a parent with a college student and I knew they weren't getting the most qualified professor for the money, I would be furious. Yet this is exactly what's going on today in our education system. It's happening in other areas also. People should be hired on qualifications, not skin color or ethnic backgrounds in order to meet quotas.

Have a great day.
